Liquid Whole Egg (Totes)

SPECIFICATION SHEET

PRODUCT NAME: Liquid Whole Egg (Totes)

COUNTRY OF ORIGIN: Multiple Countries of Origin

INGREDIENTS: Whole Eggs, Contains eggs (allergen)

DESCRIPTION: Liquid Whole Egg shall be prepared from domestically produced eggs that have been stored under refrigerated conditions immediately after collection. The eggs shall be detergent washed, sanitized, and manually inspected prior to breaking. The eggs shall be mechanically broken and filtered under USDA supervision. The liquid eggs shall then be pasteurized to meet or exceed established regulations 9CFR590.570, chilled to 40 F or below and stored in jacketed, refrigerated tanks. The eggs are then packaged, coded, palletized, and stored under refrigerated conditions (40 F or below). All Liquid Egg products shall be shipped in refrigerated vehicles.

All egg products are processed and packaged under the continuous supervision of the Food Safety Inspection Service (FSIS) of the United States Department of Agriculture (USDA). All egg products packed at Global Resources Direct LLC will comply with Egg Products Inspection Act found in Article 9 of the Code of Federal Regulations (9CFR.590) and comply with the appropriate federal, state and local regulations. Internal Quality standards assure compliance to established, written specifications.

CHEMICAL|PHYSICAL|MICROBIOLOGICAL

Egg Solids	> 23.0 %
pH	7.5 ± 0.5
Color	Natural, rich yellow, Typical
Odor	Bland. Typical of properly processed whole eggs
Total Plate Count	5,000 /g max.
Yeast	10 /g max.
Mold	10 /g max.
Total coliforms	10 /g max.
e coli	<10 /g
Salmonella	Negative
