Liquid Salt Yolk

SPECIFICATION SHEET

PRODUCT NAME: Liquid Salt Yolk

COUNTRY OF ORIGIN: Multiple Countries of Origin

INGREDIENTS: Egg Yolk, Salt - Contains eggs (allergen)

DESCRIPTION: Liquid Salt Yolk shall be prepared from domestically produced eggs that have been stored under refrigerated conditions immediately after collection. The eggs shall be detergent washed, sanitized, and manually inspected prior to breaking. The eggs shall be mechanically broken, separated and filtered under USDA supervision. All ingredients and packaging shall meet or exceed established written parameters established by Global Resources Direct LLC. Salt will be incorporated into the liquid egg prior to thermo-processing with the use of an industrial blender at 10%. The liquid salted egg yolk shall then be pasteurized to meet or exceed established regulations 9CFR590.570, chilled to 40F or below, and stored in jacketed, refrigerated tanks. The salt yolk is then packaged, coded, palletized. All liquid egg product shall be stored under refrigerated conditions (at 40F or below) and shipped in refrigerated/insulated vehicles.

All egg products are processed and packaged under the continuous supervision of the Food Safety Inspection Service (FSIS) of the United States Department of Agriculture (USDA). All egg products packed at Global Resources Direct LLC will comply with Egg products Inspection act found in Article 9 of code of Federal Regulations (9CFR.590) and comply with the appropriate federal, state and local regulations. Internal Quality standards assure compliance to established, written specifications.

SHELF LIFE: Store under refrigeration (40F or below), use within 28 days.

CHEMICAL|PHYSICAL|MICROBIOLOGICAL

Total Solids	≥ 48.7%
Egg Solids	≥ 43.0%
pH	5.6-6.6
Color	Natural, bold yellow, Typical
Odor	Bland. Typical of properly processed salt yolk
Salt	9.7 to 10.7%
Total Plate Count	5,000 /g max.
Yeast	10 /g max.
Mold	10 /g max.
Total coliforms	10 /g max.
e coli	<10 /g
Salmonella	Negative/25 grams

PACKAGING:

A. 30-pound pails: White, plastic pails and lids are formed from a food-grade resin. Each pail and lid will be sanitized prior to filling. Each pail will be labeled with the appropriate, approved label in the side as well stickered with Julian code date next to the label.

Gross wt. = 32 lbs.	Dimensions = 13" x 11" round
Cube = 1.0 cu. ft.	Pallet ct. 64

B. Custom packaging may be set up.

C. Totes: All totes have a sterile, plastic liners placed inside clean ridged, plastic totes or one use, reinforced corrugated cardboard totes. The liners are filled through a top port and be emptied through a bottom port. The totes will be labeled with the appropriate, approved label and have the Julian code date written on them.

D. Tankers: All tankers will be Clean-In-Place (CIP) cleaned, sanitized and inspected prior to loading. Each tanker will have appropriate paperwork and may be filled to approximately 48,000 pounds.
